

Valin Corporation has engineered drop-in pneumatic manifold replacements that are a perfect solution for your obsolete pneumatic manifolds on your aging fleet of process tools. These pneumatic manifolds come as a complete kit for ease of installation.

Endura SVD Slit Valve Pneumatic Manifold Replacement

Valin's AC-150-2321 pneumatic manifold comes as a complete kit for ease of installation. Current Endura pneumatic manifolds 0010-20052 & 0010-70297 are up to 25 years old with potential Cv leakage and are obsolete. The Endura Slit Valve Door pneumatic manifold kit installations completed by Valin to-date have resulted in significant yield improvements by preventing tool faults and shutdowns. Valin's drop-in pneumatic manifold replacements are a complete solution! Learn more about Valin's Endura SVD Slit Valve Pneumatic Manifold Replacement by using the QR code below.

CLEAN, SIMPLE DESIGN

Endura TxZ Remote Gas Box Pneumatic Manifold Replacement

The AC-150-2473 Endura TxZ Remote Gas Box pneumatic manifold is a 10-station manifold with 2x3/2 pneumatic valves (20 valves total). It comes as a complete kit for ease of installation. The kit includes the pneumatic manifold, mounting plate, in-line shut off valve, and cable for remote control of EV20. As a complete drop-in solution, it is pneumatically, electrically, and physically compatible with the Endura TxZ Remote Gas Box assembly. In addition to reliability, the larger valve Cv results in faster response times. Learn more about Valin's Endura TxZ Remote Gas Box Pneumatic Manifold Replacement by using the QR code below.

Valin Corporation has engineered drop-in pneumatic manifold replacements that are a perfect solution for your obsolete pneumatic manifolds on your aging fleet of process tools. These pneumatic manifolds come as a complete kit for ease of installation.

Centura and Centura Ultima Gas Box Pneumatic Manifold Replacement

Valin's AC-150-2444 pneumatic manifold comes as a complete kit for ease of installation. The AC-150-2444 replaces Centura pneumatic manifold part 0190-09487 & 0190-02046 for both the lower and upper gas box without NF3 interlocks. Adding the AC-150-2466 NF3 Interlock kit to Valin's AC-150-2444 Standard Gas Box Manifold can replace the Centura manifold part 0190-09487 (Rev A). This manifold enables the NF3 interlock circuits in the controls. Learn more about Valin's Centura Gas Box Pneumatic Manifold Replacement by using the QR code below.

Centura and Centura Ultima Chamber Pneumatic Manifold Replacement

The AC-150-2463 Centura Chamber and the AC-150-2459 Centura Ultima pneumatic manifolds come as a complete kit for ease of installation. These are 14 Station, 14 Valve Manifolds and replace Centura pneumatic manifold part 0190-20124. Each kit includes a pneumatic manifold with SVD LOTO On/Off control valve, mounting plate, PCB and cable. As a complete drop-in solution, these are pneumatically, electrically, physically compatible with the Centura and Ultima chamber assemblies. Both improve reliability and the larger valve C_v results in faster response times.
